Project Title: Wild vegetables cultivation

Team Members: Pratiksha H., Harshata T., Priya Z., Sneha G.,

Abstract: Vegetables naturally grown in fields are called “wild” or “ native" vegetables. These plants come without being planted in nature. Wild varieties of vegetables are used to develop new varieties. Every vegetable rich in minerals, iron, fiber etc. and promoting the growth of these plants can lead to a healthier society without the introduction of harmful, invasive species.
